## SUMMARY

I am a self taught software developer with experience in JavaScript, NodeJs, Python and React. I am currently familiarising myself with Kotlin for Android development, but with a good foundation of computer science principals especially object oriented programming. I am also an AWS certified cloud Practitioner and soon to be Associate Cloud Engineer through The Google Africa Developers Scholarship.

## EXPERIENCE

### Mozilla, Nairobi — Independent Data Contractor, Common Voice Swahili

AUGUST 2021 - PRESENT

Collection and validation of Swahili voice data to be used in curating a Swahili open source data set to be available to the public for use in training Natural Language Processing AI models for Swahili to English voice and text translation..

### Andela, Nairobi — Google Africa Developer Scholarship Mentor

JUNE 2021 - PRESENT

Learner mentorship in the Google Cloud track of the Google Africa Developer Scholarship (GADS) 2021 program. This includes but is not limited to; daily meetings with learners to gauge their progress in the program, unblock them where they have challenges with the course material and giving an account of the student progress to Andela, one of the education partners in this program.
